#### North Carolina Settlement with Chemours

**Key Message:** On November 26, 2018, North Carolina notified EPA of the state's proposed \$12 million settlement with Chemours to address violations at the company's Fayetteville, NC facility. The proposed order requires Chemours to significantly reduce GenX air emissions through control technologies, conduct health studies, provide permanent replacement drinking water supplies, and pay a civil penalty to the North Carolina Department of Environmental Quality.

## **Discussing PFAS Preliminary findings with New Jersey DEP**

On December 4 and 5, ORD will meet with the New Jersey Department of Environmental Protection (NJDEP). The ORD team will share data reports and discuss preliminary findings with NJDEP project partners on the detection and distribution of PFAS compounds in water bodies, soil and vegetation in an industrialized area where PFAS are manufactured. Additional ORD presentations will include an overview of non-targeted analysis methods and a summary briefing to NJDEP management and staff. The trip will also include a visit to a chemical manufacturing facility.
